## *ICOI International Credentialing Committee*

Our International Credentialing Committee is composed of members who are authorised, based on their credentials, to promote and approve case presentations of those members seeking Fellowship, Mastership and/or Diplomate status in the ICOI. Recognizing that clinical techniques may vary in the international arena, these members are entrusted with the responsibility of approving implant surgical and restorative cases and providing their recommendations to the Executive Committee for final approval. In the year 2000, one member was added to the International Credentialing Committee, Dr. Hajime Okudera from Tokyo, Japan. In 2001, the Committee has been expanded to include all the distinguished members listed in this column.

## *ICOI International Ambassadors' Circle Award*

The ICOI International Ambassadors' Circle Award represents a special group of members who have made selfless contributions to further the purposes of the ICOI and to encourage substantial new membership. These members have, during their international lecturing, helped foster the ideals of the ICOI and have increased our membership in the process. As our quintessential ambassadors, we thank them for their efforts.

At least one new member will be added to this elite fraternity at our World Congress in Las Vegas, June 1 to 3, 2001.
